

AKSHAT MAHAJAN

Software Engineer | Full Stack & iOS

akshatmahajan32@gmail.com | +91 91714 88184 | Indore, India | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFILE

Full-stack and iOS engineer with expertise in system design, scalable architecture, and performance optimization. Proven track record: 45% API latency reduction, 25% frontend optimization, and 25% stability improvement. Specialized in designing distributed systems, microservices architecture, and implementing high-performance solutions at scale (10k+ MAU). Strong in MVVM patterns, Redux state management, and modular component architecture.

PROFESSIONAL EXPERIENCE

iOS Software Engineer

[DigiValet](#) | 01/2026 – 06/2026 | Indore

- Architected modular iOS SDK using MVVM + dependency injection pattern; designed scalable system reducing feature integration time 20% and establishing reusable foundation for team scaling across 5+ production screens
- Led API performance optimization initiative achieving 45% latency reduction (800ms → 440ms) through async/await networking, request batching, and intelligent caching—measurable 0.4s app responsiveness improvement
- Stabilized application crash rate by 25% (0.8% → 0.6%) via systematic memory leak resolution, retain cycle elimination, and optimized state management; implemented automated profiling in CI pipeline for ongoing reliability
- Engineered reusable UI component library (15+ components) in SwiftUI with design system consistency; enabled 20% faster feature development and reduced code duplication across platform

Frontend Software Engineer

[Itigai Technologies](#) | 08/2025 – 10/2025 | Remote

- Led frontend performance optimization achieving 25% page load reduction (FCP: 3.2s → 2.4s) through component restructuring, render optimization, and React.memo/useMemo—direct UX metrics impact
- Designed real-time chatbot interface handling concurrent sessions with <500ms latency using WebSocket, event-driven architecture, and efficient state synchronization; managed 40% backend load reduction through intelligent caching
- Implemented Redux state management with memoization patterns, eliminating 60% redundant API calls; architected stateless frontend design supporting horizontal scaling

CORE SKILLS

System Design & Architecture: MVVM, Redux, Microservices, Distributed Systems, Scalable Architecture, Performance Optimization, Caching Strategies, API Design

Languages & Frontend: Swift, JavaScript (ES6+), TypeScript, React.js (Hooks, Context, Performance), SwiftUI, UIKit, Redux, Tailwind CSS, Responsive Design

Backend & Databases: Node.js, Express.js, REST API Design, MongoDB (optimization, indexing), PostgreSQL, Redis (caching), Query Performance Tuning

Tools & DevOps: Git/GitHub, Xcode, VS Code, Docker, CI/CD (GitHub Actions), Postman, Vercel, Render, System Design Principles

PROJECTS

Code Journey – Developer Learning Platform (Distributed Architecture Evolution)

- Architected scalable system evolution: MVP (HTML5/CSS3) → Production (React + Redux + Node.js + MongoDB) supporting 1000+ users and 50+ interactive lessons
- Designed distributed backend: implemented MongoDB indexing and query optimization reducing API latency 500ms → 120ms; built RESTful API with horizontal scaling support via stateless design
- Frontend system design: achieved 66% FCP improvement (3.2s → 1.1s) through React.memo, useMemo, lazy loading, and component memoization; eliminated prop drilling via Redux state management
- DevOps & deployment: implemented CI/CD pipeline (GitHub Actions) on Vercel enabling zero-downtime continuous deployment and monitoring

Predictive AI Platform – Full-Stack ML System Design

- Designed end-to-end system architecture: integrated ML predictions with real-time frontend; architected stateless REST API handling <200ms p95 latency supporting horizontal scaling
- Data pipeline optimization: implemented intelligent caching strategy reducing computational overhead 40%; designed efficient feature engineering and model tuning achieving 75% prediction accuracy

EDUCATION

Bachelor of Technology - Computer Science (IBM) | Shri Vaishnav Vidhyapeeth Vishwavidhalaya | 08/2022 – 06/2026 | Indore
